7 Electric motors (except for land vehicles), power and drive motors and associated starters (except for land vehicles); electric generators, turbines; compressors, starters for power and drive motors (included in this class); compressors for charging internal combustion engines (included in this class); catalytic converters and catalyst substrates for internal combustion engines (included in this class); appliances and equipment for the production, control, distribution and delivery of compressed air; pumps (included in this class); machine tools, pipe shaping machines; machines, devices and appliances for cleaning and treating chemical products; machine boilers; centrifuges and separating nozzles for uranium enrichment; equipment and machinery for the automated handling of tools and workpieces; injection nozzles, fuel rails; vehicle fuel-injection valves; filters (included in this class); electric kitchen machines and equipment for food preparations and processing including mincing machines, mixing and kneading machines, juice extractors, centrifuges, slicing machines, grinders, dishwashers; electrical machines and appliances for handling laundry and clothing including sewing machines, washing machines, spin driers, laundry presses, ironing machines; dry-cleaning machines and appliances; waste disposal units including waste masticators and compressors; electric motor driven tools, electric can openers, electric machines for working on parquet floorings; polishers for other than household applications; electric motor driven tools; electric can openers; knife sharpeners (included in this class); electric irons, electric cleaning equipment, electric vacuum cleaners and their components particularly vacuum cleaner nozzles and brushes; electric floor cleaners and polishers; electric carpet beaters and cleaners; lambda probes.

9 Scientific appliances, devices and instruments for laboratory research purposes; electrotechnical and electronic appliances, devices and instruments (included in this class); physical, chemical, optical, photographic, nautical and geodetic appliances, devices and instruments; weighing, signalling, measuring, counting; recording, monitoring, testing, open and closed-loop control and switching devices; electric switchgear and control cabinets; plug-in modules comprising essentially of parts in any combination to locate and/or combine printed-circuit boards; thermostats; lasers for technical purposes; electron microscopes; remote control devices, automatic machines which are coin or token-operated; electric cables and insulated wires including auxiliary cable laying equipment such as installation rollers, cable sliding rollers, joint box relief systems, drum stands, cable drums, delivery spools and splicing machines; conductor rails; cable accessories; electrical installation material (included in this class) particularly switches, dimmers, sockets, switched socket outlets, splitting boxes, aerial sockets, loudspeaker outlets and junction boxes, communications plug-and-socket devices; window louvre pushbuttons and switches thermometers; hygrometers; plug-and-socket connections, fuses, screw-in miniature circuit-breakers, proximity switches, residual-current operated circuit-breakers, relays, contactors, cable lugs, cable junction boxes, cable cabinets, fuse boxes, branch boxes, junction boxes, distribution cabinets, switchboards, time switches, electricity meters; ultrasonic and infrared transmitters and receivers and associated relay stations for switching, dimming and momentary contact switching functions; modules for switching and dimming; time-delay switches; synchro-generators; filament transformers with electric starting and for brightness control of fluorescent lamps; control gear and automatic control equipment for fluorescent lamps, switching and control gear for building services

management systems; signalling devices, door entry security systems, distribution, ducting and laying systems for electrical installations; electric and electronic alarm devices and systems and site security devices and systems, particularly intruder detection systems and police alarm systems, anti-theft systems, security access systems and video monitoring systems; infrared pass-key systems; autonomous hazard signalling devices and protection equipment for water and fire damage, electronic tagging systems; personal identification devices; electric and electronic equipment and systems for process instrumentation and control engineering; servicing equipment and automated machinery for power plant applications, i.e. pipe testing equipment; equipment for non-destructive testing of materials in power plants, eddy-current test equipment, ultrasonic test equipment, leakage detectors, manipulators, equipment for decontaminating power plant components that have become contaminated with radioactivity; electric recording and measuring equipment for air, water and soil pollution, and for noise, vibrations, radioactivity and meteorological data; electrical and electronic devices and systems for water purification and treatment; process engineering equipment, i.e. pressure throughflow measuring instruments, pressure gauges, regulators, actuators; electrical and electronic devices for analytical technology such as systems analysis, chromatography, X-ray analysis; X-ray equipment for technical purposes; weighing technology devices and systems; electric couplers; programmable logic controllers, particularly for machine tools, manipulators, robots, assembly and material processing machines; electrical equipment for machine tools and special purpose machines; devices and their components and systems consisting of such devices and components for the identification and localization of leaks in tanks and containers holding solid, liquid and gazeous substances; equipment for non destructive materials testing; high-voltage, medium-voltage and low-voltage circuit-breakers and switchgear; h.v.d.c. transmission systems; electric rectifiers and inverters, instrument transformers; arresters, vacuum tubes for switchgear; switchgear cabinets; metering devices for use in conjunction with electricity, gas, liquids and heat; I&C equipment and devices for switchgear and power system control; transformers; power cables; electronic dynamometers and torque measuring equipment, electronic load indicators; solar collectors; emergency power supply devices; electrotechnical, electronic and ceramic components and subassemblies consisting of such components (included in this class); electric batteries, fuel cells, accumulators; solar cells and solar energy systems constructed thereof, sensors: optoelectronic components and subassemblies consisting of such components (included in this class); optocouplers; electrical resistors; capacitors; inductors; coils; NTC and PTC thermistors; filters (included in this class); printed, etched, potted and integrated circuits, chip cards; chip card readers; testing devices for electrotechnical and electronic components and subassemblies; magnets and resonators; electronic tubes, surge voltage protectors; equipment for the recording, emission, transmission, reception, reproduction and processing of sounds and/or characters and/or images; communication devices and systems made up of such devices; data switching and transmission devices; devices and systems for mobile radio communications; devices and systems for the transmission of voice, data and images; satellite earth stations; telecommunication cables and optical fibers for electrical and optical transmission of voice, data and images; telephones, telephone systems; videophones; car phones; telephone answering machines; charge indicators; paging systems; telephones with integral fax machines; two-way radios and radio sets; intercom and two-way intercom systems; modems; couplers, transceivers, concentrators, power supply devices (included in this class) and collision detect devices and optical plug-in modules for fiber-optic communications technology; television cameras; radios; car radios; television sets; record players; CD recording, equipment and players; cassette recorders; video recorders; aerials and aerial systems; radar sets; short-wave transmitter and receiver stations; radio access systems; ground-air communication systems; radio link equipment; satellite communications equipment; encoding devices; thermal imaging devices; laser distance measuring equipment; IFF systems for aircraft; devices for reception, localization and classification of electromagnetic signals; navigational devices for land vehicles, watercraft and aircraft; traffic decoders; pilot computers; on-board computers; devices for airbag diagnosis; temperature sensors; cable harnesses; vehicle wiring systems; electric devices for motor control; ignition, ignition control and ignition trigger devices; electric devices for fuel injection control and central fuel injection; resonators for automotive engineering; electronic control devices for gear, drive, differential, braking, antiskid, four-wheel steering, damping, self-levelling suspension and clutch systems; automobile diagnostic equipment; acoustic and optical signalling devices and annunciators; devices for railway signalling technology and systems constructed from such devices; electric signal boxes and their components; electro-acoustical and conference systems and equipment for audio and video studios; audio and video transmission and control systems; appliances and devices for cable TV and systems made up of such items; photographic and film equipment including video cameras; loudspeakers; loudspeaker boxes; microphones; earphones, electronic amplifiers; electric film-wrap welding devices; kitchen scales; personal scales.

10 Electromedical, medical, surgical, dental, veterinary appliances, devices and instruments; electromedical appliances and devices, and systems and their components consisting of such, for diagnostic radiology and radiotherapy; fluorescent screens; angiography, cardiography, neuroradiology and subtraction angiography (DSA) equipment; digital recording equipment for contrast medium examinations with real time imaging.

11 Lamps and luminaires and their components; specular reflectors for lighting fixtures; light distribution appliances; heaters, infrared lamps, ribbed tubular heaters, heating conductors; heating mats, electric underfloor storage heating systems; heat pumps; icecream makers; tumble driers.

12 Land vehicles, aircraft and watercraft; catalytic converters and catalyst substrates for the traction or propulsion systems of land vehicles, aircraft and watercraft; restraining systems for land vehicles, i.e. airbags, seat belt tensioners.

14 Microchronometers.

16 Paper, paperboard (cardboard) and goods made of these materials included in this class; printed material

bookbinders' requisites; photographs; stationery; adhesives for paper and stationery or for household applications; artists' requisites; paint brushes; typewriters and office requisites (excluding furniture); teaching and instructional material (excluding appliances); plastic packing material included in this class; playing cards; printing letters; printing blocks.

35 Advertising; business management; business administration; office work.

36 Insurance; financial affairs, monetary affairs; real estate affairs.

37 Building construction; repair of electrical equipment and electrotechnical installations of all kinds; installation work.

38 Telecommunication; renting of communication transmission devices and equipment.

39 Transport; packaging and storage of goods.

41 Instruction, arrangement, organization and holding of training courses and seminars; imparting of knowledge; publishing and editing of books and journals.

42 Research and development for others in the fields of electrical engineering, electronics, information technology, medical engineering, physics, chemistry and mechanical engineering, as well as planning services, technical and scientific consultancy services, engineering services and technical monitoring/supervision in these fields; construction and design planning and consultancy services; computer programming; renting of devices and equipment pertaining to electrical engineering, information technology and medical engineering; materials testing; technical consultancy services in the setting up and operation of data processing systems, databases and telecommunication networks; planning, development and design engineering of telecommunication and information processing services and facilities and telecommunication networks and pertinent tools; planning, consultancy, testing and technical supervision/monitoring in the fields of systems and product integration of telecommunication networks and data processing; electronic services, i.e. collecting, storing, translating, passing on or distributing of data, information, images, video and audio sequences, provision and communication of information stored on a database, in particular also by means of interactively communicating (computer) systems; development, generation and renting of data processing programs.
